

Dive the Philippines and experience a wider variety of dive sites and destinations.

The Yacht has been built by divers for divers and every thought has gone into making her a yacht aboard which divers will be comfortable. Relax in the convenience of a highly experienced crew who work tirelessly to ensure your diving vacation is second to none.

This 40-meter refined liveaboard was designed and built using the lessons learnt from our first yacht the S/Y Siren and has been modified to better suit the growing needs of our guests. The 8 cabins are all situated forward of the engine room with 2 fixed double bed cabins located at the bow and 6 twin bed cabins throughout the remaining lower deck quarters, however we offer flexibility with 2 cabins which can be converted from twin to double should guests require (cabins 5 & 6). The outdoor dining area offers a superb setting for all your meals, with comfortable bench seating set in a semi-circular shape. The dive deck is likely to be one of the most spacious you will have ever come across, except for on other Siren Fleet yachts!

The liveaboard has designated indoor and outdoor workstations for charging, preparation and maintenance of your camera and video equipment. Large storage drawers for your peripheral items are available, as well as numerous charging points, with adapters available (sockets are 2-pin European style at 220v or 110v) Naturally, we also have large rinse tanks with fresh water solely for camera and video equipment – this vessel truly sets out to be the pros choice for underwater photography and videography.

The liveaboard offers many between-dive activities such as movies, audio-video entertainment, as well as a big flat screen in the lounge and a library in the air-conditioned Main Saloon. For some extra action, go Snorkeling, Kayaking or take a Shore Excursion. They also have an on-board shop where you can buy accessories. If relaxing in comfort is more your style, sunbathe or take a nap on the shaded Sun Deck on the cushioned lounge chairs. Guests may even utilize the onboard Masseur for a luxurious massage.

THE OWNERS OF THE LIVEBOARD ARE CONVINCED THAT GREAT FOOD IS AN ABSOLUTE MUST FOR ANY LIVEBOARD EXPERIENCE.

Divers created the menu because they know which food will provide strength and energy during a dive safari. On the liveaboard, you can choose your favorite dish from a buffet. Enjoy the amazing backdrop of the seascape for all meals which are served on the covered, open air Main Deck.

Menu choices feature a variety of Asian as well as Western style meals as well as incredible desserts. If guests have special dietary requirements: vegans, lactose free etc. (within the possibilities of the country we operate in), these can be catered with advanced notice. Complimentary local beer is included and wine and cocktails can be purchased.

Snacks and nonalcoholic beverages are available all day between meals.

All our liveaboard prices include:
